

**Project Lifesaver
Offers State of the
Art Technology**

Project Lifesaver was established in April of 1999 as an initiative of the 43rd VA Search and Rescue of the Chesapeake Sheriff's Office.

Project Lifesaver's mission is to use state of the art technology in assisting those who care for victims of Alzheimer's, dementia, Autism, Down syndrome and any other cognitive condition that cause wandering. There are no boundaries — no one is immune!

Purpose of the Program:

The Project Lifesaver program places personalized radio transmitters or GPS locators on identified persons

Transmitters assist caregivers and local emergency agencies in locating those who cannot help themselves.

Local emergency teams respond to calls resulting in an average rescue time of 30 minutes.

Project Lifesaver International is a 501(c)(3) non-profit organization headed by retired law enforcement. Project Lifesaver is located in 48 states, six Provinces in Canada, and Australia.

Funding for Project Lifesaver is a result of private and corporate donations and grants. Donations are used directly for programs, rescues and educational expenses.
